

- \$, \$\* %Fiber optic dome splice closure for 24 fibers

Short Description

The optical splice closures are used to distribute, splice, and store the outdoor optical cables which enter and exit from the ends of the closure. They are applicable for overhead, man-well of pipeline, embedded situation etc. The closures are more secure due to presence of seal for higher protection. The inclusion of sealing ring and air valve makes it more suitable for relevant application areas. They are applicable to ribbon type optical cable and common optical cable. Splice trays inside the closure rotate like booklets and have sufficient space for winding the optical fibers.

Features

- Max capacity: 24 cores
- The closure casing is made of quality engineering plastics
- Number of Cable Entrance/Exit: 1:3
- Diameter of Cable: 3 small round ports (16mm Ø)
- Diameter of Cable: 1 oval port (20mm Ø)
- Mounting kit and splice covers included
- Temperature: -40 ~ + 60
- IP68 protection
- It allows convenient maintenance and can be opened repeatedly
