

908063 Fiber optic dome splice closure for 48 fibers, IP68

Short Description

The optical splice closures are used to distribute, splice, and store the outdoor optical cables which enter and exit from the ends of the closure. They are applicable for overhead, man-well of pipeline, embedded situation etc. The closures are more secure due to presence of seal for higher protection. The inclusion of sealing ring and air valve makes it more suitable for relevant application areas. They are applicable to ribbon type optical cable and common optical cable. Splice trays inside the closure rotate like booklets and have sufficient space for winding the optical fibers.

Features

- Max capacity: 48 cores
- The closure casing is made of quality engineering plastics
- Number of Cable Entrance/Exit: 1:3
- Maximum cable diameter: 8-20mm
- Dimensions of oval port: 299x178mm
- Mounting kit and splice covers included
- Temperature: -40 ~ +65
- Number of trays: 4
- Tray capacity: 12 splices

Item code	Dimensions in mm	Weight in kg
