Wireless Action Speaker

The Conceptronic WiFi Action Speaker is a Bluetooth multimedia speaker which connects to any Bluetooth phone, iPad, tablet, or laptop. Light enough for easy carrying but with plenty of size and power, the HiFi speaker is designed with the outdoors in mind...plenty of bass provided by a 5¼ inch subwoofer, graphic equalizer controls and a dual-gear volume/bass controller for adjusting your tunes to suit the environment. The speaker comes with a shoulder strap to assist with carrying, and rugged feet keep it level on pretty much any surface. As well as being portable, the device is versatile enough to work with low-power USB devices and can play music directly from a micro storage chip or USB drive. Lasting 6 hours at medium volume, the battery recharges with a standard USB charger, so can be powered up from the USB port in your car, via a laptop or using mains power - making it perfect for taking to a BBQ or beach, getting away camping for the weekend or just enjoying your tunes for hours in the great outdoors.

Highlights

- > Bluetooth 2.1 wireless connectivity
- > Passive HIFI SUBWOOFER Speaker
- > 1000mA rechargeable battery built in. Sustains 24hrs standby and 6hrs operation at medium volume
- > Plug and Play MP3 music from SD/TF card, USB
