3-fold Protection
From bacteria, viruses and fungi

Surface disinfection spray 200 ml

For household, office and on the road

Art. No.: RP0018

The surface disinfection spray from LogiLink enables you to disinfect surfaces, equipment and cavities – that can be wiped clean with a damp cloth – quick and easy. For example door handles, handrails, waste bins, mobile air conditioners, humidifiers, mice and keyboards.

RP0018 has a broad effectiveness against Gram-positive and Gram-negative bacteria and fungi and is also effective against enveloped viruses such as corona or influenza viruses, due to its high alcohol content. Please note that the RP0018 is a disinfectant and algae control product not intended for direct application on humans or animals. Made in Germany.

Application:

Bring aerosol can to room temperature before use and shake vigorously.

Then spray the pre-cleaned surface from a distance of 15-20 cm until completely wetted and allow the active ingredient film to air dry. Done.

Features:

- » For applications on damp wipeable surfaces/objects and washable textiles
- » Gentle on the material, free of perfume and dyestuff
- » Broad effectiveness against gram-positive and gram-negative bacteria and fungi
- » Due to the high alcohol content also effective against enveloped viruses (corona, influenza)
- » Content: 200 ml

Active Substances:

98g / 100g 2-Propanol, 0.1g / 100g Alkyl (C12-C14) dimethylbenzylammonium chloride (ADBAC (C12-C14)). Contains: 2-Propanol.

Biocide registration number: N-49417

Use biocides carefully. Always read the label and safety data sheet before use.
