

USB-0502 Version: 1

Gigabit USB Network Adapter with USB Hub

Fast and easy connection with USB

The LevelOne Gigabit USB Network Adapter with 3-Port USB Hub allows easy connection to the internet through the built-in USB port on your laptop or gaming console. Now you no longer need to have an Ethernet connection in order to surf the web. This is an ideal solution for MacBook Air (100% Mac compatible) or other computers that may have wireless built-in but don't come with an Ethernet port. Sometimes you need to physically connect to a network cable to help transfer files or access secure information. The USB-0502 easily does the job, all through your USB port. The USB-0502 also provides a USB hub with 3 extra ports, so you can connect external USB peripherals such as an MP3 player, digital camera, printer or pen drive. The USB-0502 establishes a direct point-to-point contact between the hub and the adapter that's plugged into your PC.

Reliable, efficient and standards compliant

The USB-0502 is USB 2.0 and 3.0 compliant. It also follows Ethernet standards 802.3, 802.3u and 802.3ab as set by the IEEE, allowing you to take advantage of Gigabit Ethernet speeds of up to 1000Mbps. This provides a strong backbone for any high-speed broadband connection to the internet as well as fast speeds for Local Area Network file transfers.
